GoodYear 045 3/8 Inch by 50 feet Safety Yellow Rubber Hose review

The **GoodYear 045 3/8 Inch by 50 feet Safety Yellow Rubber Hose** is a high quality that is designed for efficient operation of air tools. It is reinforced for durability and dependability.

Its sturdy make is able to withstand high pressure and does not compromise its flexibility.

Even in low temperature, the quality of the work done by the hose is exceptional and it remains soft.

It is highly resistance to the harsh conditions it is bound to be exposed to in industrial sites. This

GoodYear 045 hose is a great investment to increase the efficiency of work done commercially.

The hose is applicable in many tasks both for the commercial users as well as DIY enthusiasts who like to have handy products. It is an industrial grade hose that is capable of supporting the air needs of pneumatic **accessories** of various pressure requirements.

With a working pressure of 300 PSI and a burst pressure of 1200 PSI, it is a reliable companion in the work site. It is also resistant against oil and abrasions. The little tears and rips that would drastically lower its working capacity are not a concern due to this aspect. **More details...**

Durability

The *GoodYear 045 3/8 Inch by 50 feet Safety Yellow Rubber Hose* is built to last. It is made out of high quality rubber which makes it flexible while maintaining the toughness. The rubber has been enhanced for further effectiveness. It has dual braided and of a four spiral structure.

This ensures that accidental scuffs and snags will not have the effect of bringing tears and rips. It has a diameter of 3/8 inch which offers great air flow. The ends of the hose are 1/4 Inch ends offer air resistance which is important due to the force built over the fifty feet length.

Temperature Adaptability

The main problem affecting other types of hoses is the effect temperature has on them; unlike the adaptability of the **GoodYear 045**. In high temperatures, most pipes will become extremely soft and will bend easily, appearing weak.

In cold temperatures, material such as vinyl will become so stiff and resistant to movement. When air is pumped through them,

they will take various shapes resisting uncoiling. This makes it highly inconvenient to use them in certain seasons and times of the day.

The *GoodYear 045* is a soft and flexible hose. In heated temperature, it still maintains the structure and does not become a vulnerable material. In cold temperatures, it does not become hard to manipulate. The air still flows in smoothly and it will automatically uncoil and return to shape easily. This saves a lot of time that would be used in attempting to force the hose into a straight shape. [More details...](#)

Resistance to Oil and Abrasion

The rubber material that has been used for this hose is oil resistant. This makes it ideal for air flow. It also has an excellent anti-abrasion quality which makes it useful in rough construction sites where everything is sharp and rough.

Other Product Features

With a length of 50 feet, this hose is ideal for maneuvering between obstructions, heights and distance. It also comes with brass ferrules ideal for fastening and reinforcement as well as barbed fittings for connecting tubing. The vinyl guards also provide relieve from strain for hoses which prevents kinks from developing.
